

and parts of the related sections of 3. I was assigned "Head" of the function sections (2.2 and 3.2). When I say "Head" I mean these people will contain the old SRS document which was checked for errors, therefore if anyone wanted to know what needed fixing they would know who to address to.

I will be working with Joaquin in sections 2.2 and 3.2 which are very complicated in the sense that there will be diagrams and will effect how the software will work. Francisco, Emmanuel and Luis will be working together with the rest of the document. Again we agreed to continue online (skype, google docs, etc) to make sure all modifications are in sync.

We have the following assigned ~~work~~ ^{tasks}:

Emmanuel: 3.3, 3.4 and 3.5 (same in sec 2)

- a) 3.3 Performance Requirements
- b) 3.4 Logical Database Requirements
- c) 3.5 Design constraints
- d) 2.3 User characteristics
- e) 2.4 Constraints
- ~~f) 2.5~~
- 5) PowerPoint Presentation

Luis: 3.1 ~~and 3.2~~ (sec 2.1 ~~and 2.2~~)

- a) 2.1 Product Perspective
- b) 3.1 External interfaces

Francisco:

- a) 2.1 Software system attributes
