

~~The SRS document took 51 pages and the presentation~~

The presentation touches the most important points of the Document like the purpose of the SRS, Scope, all the system interfaces, functions, assumptions, dependencies and constraints.

For the presentation Gabriel makes an example of the user interface using paint. This example is what the user might see when our product is finished.

The SRS document took 51 pages and the presentation took 29 slides.

equipment List:

- 1) computer with internet access
